Subject: Sediment Forum and CSTAG collections

There are two similar collections in SEMS-RM publishing to SEMS-Pub
Sediment Forum 11-31217 <http://semspub.epa.gov/src/collection/HQ/SC31217>
CSTAG 11-32313 <http://semspub.epa.gov/src/collection/HQ/SC32313>

They are not identical.

The CSTAG is being built first from documents that I am finding that already existed in SEMS-RM in the regions. These would be official records and will be used when a duplicate record was scraped from the web as part of our transformation efforts.

The Sediment Forum is currently a collection of the various sediment documents scraped from the web. Some/many may be duplicates of official documents already captured by regions into SEMS-RM.

Among other cleanup/QA activities on all collections: I will move those regional documents into the Sediment Forum collection replacing the duplicate document.

Result: document numbers and document links may be changing.

I'll make the Sediment Forum and CSTAG collections my first priority out of the 40+ collections.

Sarah, you might want to know that you can access all documents in all regions from SEMS-RM rather than via the web. Contact Bill Bushee if this is of interest.
Using SEMS-RM gives you much greater search capabilities.

Thank you for your patience

Subject: RE: Form submission from: Superfund Contact Us About Superfund form

So when looking at the searchable table, and typing "pass" in the box, I get two filtered in the list related to Passaic river:

the site's administrative record.

Show entries Search:

Search for Sediment Forum Documents. Alternatively, view the collection of Sediment Forum documents [here](#).

Year	Title	Region
2008	MEMORANDUM REGARDING THE REGION 2 RESPONSE TO THE CONTAMINATED SEDIMENTS TECHNICAL ADVISORY GROUP (CSTAG) RECOMMENDATIONS ON THE LOWER PASSAIC RIVER PROJECT EARLY ACTION (PDF) (pp. 22 About PDF)	Region02
2001	REPORT ON PASSAIC RIVER RESTORATION INITIATIVE: A NEW MODEL FOR CLEANING UP OUR NATION'S CONTAMINATED URBAN RIVERS (PDF) (pp. 11 About PDF)	HQ

Year	Title	Region
------	-------	--------

Showing 1 to 2 of 2 entries (filtered from 66 total entries) Previous Next

Which I believe are the same two documents listed in the bulleted list:

- **Lower Passaic River, Newark, New Jersey**
 - CSTAG Recommendations for the Lower Passaic River Site (PDF) (12 pp, 122 K)
 - Regional Response to CSTAG Recommendations (PDF) (22 pp, 1.8 MB)

Those are the ones, right?

-Bill

Yes, thanks. It does help. Though interestingly, the 4/1/2008 CSTAG Recommendations for the Lower Passaic River Site is not in the table of documents, even though it is named in the list below.

Hi Sarah-

Page has been updated. Hopefully this improves the website, if but a little.

<http://www2.epa.gov/superfund/list-contaminated-sediments-technical-advisory-group-sites>

With the update, I'm curious to know if you can easily find what you are looking for now.

Appreciate your comments. Not taken as a rant, rather user feedback.

Here you go
<http://semspub.epa.gov/src/document/02/363238>

I'll send you another link of the collection which will have all the documents from the page you reference.

Sorry for the inconvenience.

Ross,

Thanks. That would be super helpful. I am looking for the following documents, which are referred to on the page <http://www2.epa.gov/superfund/list-cstag-sites>:

•Lower Passaic River, Newark, New Jersey •CSTAG Recommendations for the Lower Passaic River Site (PDF)(12 pp, 122 K) •Regional Response to CSTAG Recommendations (PDF)(22 pp, 1.8 MB)

Sarah, if you let me know your priority documents, I can them available ASAP.

We are in a period of transition, but I can expedite your needs.
Cut and paste the titles in the order you need them.

Comments:

I am trying to find CSTAG documents on the "new improved" website. After many clicks, I got to a page that listed CSTAG documents for each site, but there are no links on that page. Instead, it tells me to use the Search Superfund Documents function. But that just takes me to another page with a bunch of links. I tried searching each one and none brought me to the CSTAG documents. I also tried the Online Document Repository. I've now wasted about an hour looking for documents that used to be easily found on the CSTAG website. This is very, very frustrating and I am at my wits end. Where are the CSTAG documents? Could you please put links on the CSTAG page so people can find them? This is what I am referring to by the way:

<http://www2.epa.gov/superfund/superfund-contaminated-sediments-technical-advisory-group-cstag>

Generally, when a web page addresses a certain topic, it would be extremely useful to have the links to the related documents on that page, instead of linking to multiple additional locations. This just becomes a hall of mirrors. I used to rely on Google to find EPA documents, and now that is not useful either.

Sorry for the rant but I am under a lot of time pressure at work and my job just got a lot harder with this web redesign.
